

COMP6030 – Sprint 15 meeting minutes

Date: Monday 18th May 2026

Sprint dates: May 18 – May 22 2026

Attendees: Jaden, Sattyaj, Sinead, Saf. All team members present

Sprint goals

Finished the user study and ship fixes including light/dark mode plus the save/load feature.

Tasks planned this sprint

- Finish up user study sessions
- Begin collating questionnaire responses and observation notes
- Add light/dark theme tokens and a toggle slider
- Apply light mode across all box components
- Complete the save/load feature
- Put what-if mode on the main screen
- Centre the map when doing a route

Completed tasks and notes

- User study sessions continued through the week, on track to finish around the 25th. Began collating questionnaire responses and observation notes as they came in.
- Added light and dark theme tokens and a slider to switch between modes, and applied light mode to all of the box components including the save/load sidebar.
- Fixed hydration errors caused by the light mode slider and the line info button.
- Completed the save/load scenarios feature so users can store and reload hypothetical disruptions.
- Brought what-if mode onto the main screen and changed the UI to make it easier to see.
- The map now centres when doing a route.

Blockers / Issues

- Hydration mismatches from theming needed a few fixes (the slider and the line info button).
- Slightly reduced capacity with study sessions still running.

Actions / Next steps

- Finish collating study results and turn them into a prioritised list of fixes
- Refactor the control panel and add a guided tour
- Clean up the API docs and start the README
